## MSDS

### 1. DESCRIPTIONS

Name: Plastic Media Chip

### 2. COMPOSITION and EFFECT

Main of Composition: Polyester Resin

SiO<sub>2</sub>

Appearance: Black color, Small size solid chip, a little odour of resin, no volatilization, high hardness and its extent of density is from 1.5 to 1.6 g/cm<sup>3</sup>

Effect: Is used for mass finishing process. Deburring, Grinding, Polishing and Fine Polishing.

### **3. STABILITY**

Stabilization, Insolubility in water, No volatilization

### **4. HEALTH and SAFETY**

Innocuity, No radioactivity, No poison

### **5. EMERGENCY**

General measure for the unexpected accident

### **6. SAFEGUARD**

No contact with organic impregnant and temperature over 200°C

### **7. PACKAGE and TRANSPORT**

Packaged in polypropylene bags or carton boxes, and 25kg per bag or 50lbs per carton box. Please pay attention to aquosity during transport and stock.

### **8. FIREPROOFING**

Can be burned. General method on put out a fire.

### **9. DISUSING and HARM TO CIRCUMSTANCE**

Scrap, please according to the method on plastic product.
